

Analysis of climbing clubs

This survey is a part of the project "Staying safe in the world of youth climbing", which is co-funded by the European Union, under the Erasmus+: Sport Small Collaborative Partnerships programme. If you want to read more about the project - please visit <http://staying-safe.pdd.si/>

The project aims to encourage children and youth to participate safely in climbing, regardless of the form of climbing (sport climbing, bouldering, multi-pitch climbing, etc.). The focus of the project is on the development of appropriate training for different age groups and on suitable approaches to teaching safety maneuvers.

With this survey, we are aiming to analyze the current state of climbing, regarding children and youth, and to use this analysis to help us focus on things that could benefit from our further work.

It will take you approximately 10 minutes to finish the survey. Survey is automatically saved all the time so you can stop filling and continue later anytime.
